

## RESIZING TEXT ENTRY BOXES

Many NETSCC MIS text boxes allow a large number of characters but the entry box is quite shallow. In Firefox and Chrome the text entry boxes can be resized on screen by moving the bottom right corner. The text box returns to its normal size when the SAVE button is pressed. Internet Explorer does not have this feature.

### Mozilla Firefox

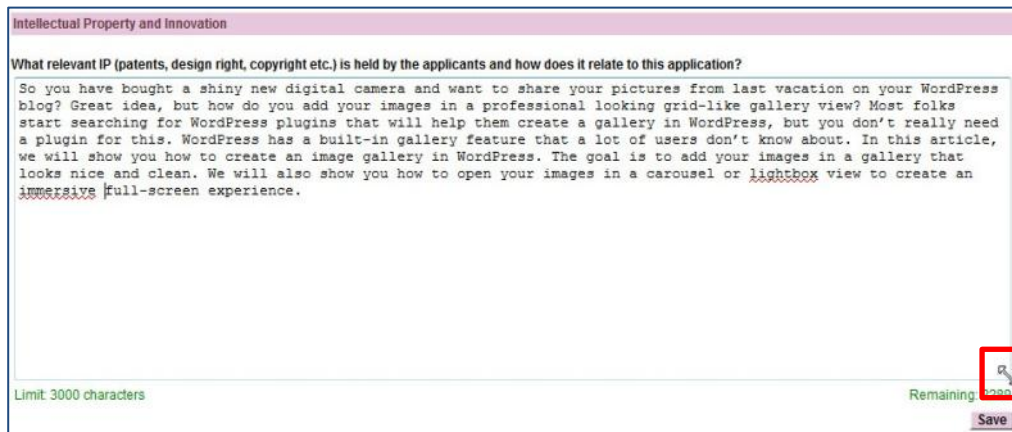

Intellectual Property and Innovation

What relevant IP (patents, design right, copyright etc.) is held by the applicants and how does it relate to this application?

So you have bought a shiny new digital camera and want to share your pictures from last vacation on your WordPress blog? Great idea, but how do you add your images in a professional looking grid-like gallery view? Most folks start searching for WordPress plugins that will help them create a gallery in WordPress, but you don't really need a plugin for this. WordPress has a built-in gallery feature that a lot of users don't know about. In this article, we will show you how to create an image gallery in WordPress. The goal is to add your images in a gallery that looks nice and clean. We
