There is no longer a benchmark by which trials are judged, therefore the data submitted by NHS providers are no longer adjusted to remove trials where the delay was out of the provider’s control. Instead, all data regardless of the source of delay are included in the duration analysis.

This performance table includes data for all providers of NHS services who have been subject to the requirement for 4 quarters or more. The main comparative measure is the “Average duration DSS to FPR”. There are a number of scenarios where this measure may be incalculable and the following convention will be adopted in these circumstances:

Scenario	Convention for presentation in the table
<b>The provider may have relevant activity to report for the period, but has failed to make a submission – “no return”</b>	The table will be populated with a hash symbol (#) in the total trials/duration columns (A-D)
<b>The provider has reported that there was no relevant activity for the period – a “nil return”</b>	The table will be populated with a hyphen in the total trials/duration columns (A-D)
<b>The provider reported relevant activity for the period, but all activity was excluded from the duration analysis – “no analysed activity”</b>	The table will be populated with zero in the total trials column (A) and a hyphen in each of the duration columns (B, C and D)
<b>The provider reported activity for the period, but had no duration(s) for DSS to FPR – “no relevant data”</b>	The table will be populated with N/A in each of the duration columns (B-D).
