Background

Funding is available from the National Institute for Health Research (NIHR) to support the academic component of two-year 50% clinical, 50% academic posts with a well-defined academic content, which may include a Master's degree. These posts are available for fully qualified General practitioners, General Dental Practitioners and Community Dentists and are described as NIHR In-Practice Fellowship (NIHR IPF). The NIHR IPFs were introduced in response to the report, ‘Medically and dentally-qualified academic staff: Recommendations for training the researchers and educators of the future’¹.

The NIHR Trainees Co-ordinating Centre (NIHR TCC) is administering the competition on behalf of the NIHR and the Department of Health and Social Care. Applications will be reviewed and recommended for funding by the NIHR IPF Review Panel.

This document provides full details of the NIHR IPF award and describes the means by which applications for NIHR IPF should be submitted and how they will be assessed.

New Application Process

Please note all applications for this round must be made using the online TCCi Award Management System (https://tcci.nihr.ac.uk) and that these guidance notes must be read in full in order to complete this process.

NIHR In Practice Fellowship scheme

The NIHR IPF offers academic training to fully qualified General Practitioners, General Dental Practitioners and Community Dentists, who are in NHS practice in England. Applicants may have received little formal academic training at the point of application, but should be able to demonstrate commitment to a career as a clinical academic in primary care and have outstanding potential for development as a future clinical academic leader. Training will be flexible and trainee-centred, with structured supervision to ensure the attainment of academic goals. Continued professional development will be expected of successful applicants.

The NIHR IPF is a two year award (or can be taken up part-time over 30 or 40 months), during which Fellows split their time equally between their clinical position and the academic training funded through the award. Applicants must, therefore, have arrangements in place for a clinical post that will constitute 50% of their proposed Fellowship. The 50% academic component of the training period may include completion of a Master’s degree and the preparation of an application for a competitive, peer-reviewed Research Training Fellowship leading to the award of a higher degree such as a NIHR Doctoral Research Fellowship. The NIHR IPF cannot be used as part of an MD/PhD qualification.

Eligibility

The NIHR IPFs are open to fully qualified General Practitioners, General Dental Practitioners and Community Dentists. Community dentists are defined as those working in the Salaried Dental Primary Care Services. Prospective applicants must not have registered for, or completed a PhD in a relevant subject area or have registered for an MPhil with the expectation that this will progress to a PhD.

Applications from individuals who are undertaking vocational training will only be considered if qualified by 1st September 2018, subject to a clear guarantee of a clinical placement for 5 sessions or equivalent for 50% of the working week. Applicants who are eligible under the above criteria and who have completed either a Master’s, an MPhil or an Academic training position such as a NIHR ACF, and who wish to use the fellowship

to support a bridging period to develop a proposal for a Doctoral Fellowship are eligible to apply, providing that the additional research training is justified and appropriate.

Any queries about the scheme, especially regarding eligibility due to previous academic experience, should be addressed to: NIHR TCC at tccawards@nihr.ac.uk or telephone 0113 3466260.

**IPF Training and Development**

Time spent in the NIHR IPF will be up to a maximum of two years or equivalent. This time will be divided between a 50% clinical commitment and 50% academic training. Satisfactory progress after the first year will be a requirement for the second year of funding.

The academic training supported through the fellowship should be trainee-centred, but must include structured supervision to ensure the attainment of academic goals. The training should engage the Fellow in an environment that has a strong academic research record, and provide the individual with every opportunity to explore their research interests.

The training may include, but is not limited to; formal courses (including Masters modules), training in specialist skills and research methodologies, leadership training, conference attendance and research visits. The completion of a formal academic qualification, such as a Master's degree, can be supported as part of the training plan, if appropriate to the developmental needs of the applicant. It is encourages that the academic element of the award should include the preparation of an application for a competitive, peer-reviewed doctoral level research training fellowship such as the NIHR Doctoral Research Fellowship.

Preliminary research in support of the subsequent doctoral level proposal (e.g. a systematic review or small feasibility study) may be proposed in the NIHR IPF training and development section of the application form. However research costs or publications cannot be funded through this award. Primary supervisors are responsible for ensuring that all necessary regulatory approvals are in place prior to undertaking any research included in the NIHR IPF training and development programme.

Applicants must detail in their application how the proposed training plan will support their development as a clinical academic and how it meets their unique training needs.

On completion of a NIHR IPF, Fellows should be able to demonstrate development as a clinical academic and be in a competitive position to apply for a PhD Fellowship. At the end of the award, Fellows are expected to show evidence of:

- Completion of the training proposed in the application;
- Preparation of an application for a competitive, peer-reviewed doctoral level research training fellowship;
- Increased research skills;
- Development of their research interests;
- Development of clinical academic networks

Evidence of the above will be sought by the NIHR through annual and final report monitoring. Fellowships cannot be deferred without the consent of the NIHR.

**Scope of Funding**

The NIHR IPF will be awarded to successful applicants but the funding related to the award will be managed by the employing organisation, which should be a Higher Education Institute (HEI) in England. Completion of vocational training or equivalent is required at the point of award. The NIHR IPF funds 50% of the applicant’s salary, while applicants are completing their academic training. The remaining 50% of the applicant’s salary
should be covered by their continued clinical commitment. Applicant salaries are dependent on clinical experience and proof of clinical salary at the time of award. The proposed salaries may range from the Senior Clinical Lecturer spine point 2 or equivalent, on the 'Universities and Colleges employers association (UCEA) clinical academics pay scale to the top of the consultant (pre-2003 contract) UK scale (adjusted for inflation). Funding is available for a maximum of two years or equivalent. Successful progress in the first year is a prerequisite for continued funding of the second year.

The applicant’s clinical host/Practice must agree to the application and the arrangements necessary to appropriately cover clinical service when the successful applicant is undertaking the academic component. Funding for research expenses and other additional costs associated with the academic component of these posts, including supervision costs must be secured from another source.

It is envisaged that a maximum of 10 NIHR IPFs will be awarded across England on an annual basis. NIHR IPF applicants can undertake the award at:

- Full time: 100% WTE for 24 months; or
- Less than full time: 80% WTE for 30 months; or
- Less than full time: 60% WTE for 40 months.

Awards of any other duration or profile cannot be funded. Employment or activities undertaken in the remaining time outside of the NIHR IPF are at the awardee’s own discretion and are not funded by the award.

NIHR Personal awards are not project or programme grants; therefore, extensions to the duration of awards to allow for completion of training and development are not permitted. This does not affect suspensions of awards to allow for periods of maternity, paternity, adoption or sickness leave.

An NIHR IPF funds:

- 50% of the award holder’s salary (including the employer’s contribution to National Insurance and Superannuation) to support the academic component of the Fellowship;
- A training and development programme appropriate for a NIHR IPF (as detailed in the application) comprising
  - Up to £4,500 towards training and development
  - Up to £1,000 bursary for conference/meeting expenses; travel, subsistence and registration fees

The Fellowship does not include, or pay for, any research costs or full economic costing.

The costs requested in the finance section of the application form will form the basis of the Fellowship funding should the application be successful. All costs requested should be ‘value for money’ and will be assessed by the NIHR and members of the NIHR IPF Review Panel. The NIHR reserves the right to reject any costs that it considers unreasonable or not fully justified.

**Application Process**

- Applications must be made using the online TCCi Award Management System - [https://tcci.nihr.ac.uk/](https://tcci.nihr.ac.uk/)
- Applications must be submitted to NIHR TCC using the online application system by **1.00pm on 28th March 2018**.
- **Late applications will not be considered under any circumstances.**

**Registering**

Before an application can be started, prospective applicants are required to register on the online award management system. Applicants will be asked to supply a valid email address and to complete some basic
information. Once this has been submitted, applicants will receive an email confirming their registration and a temporary password. Applicants should follow the instructions in the email to log onto the system.

Once signed into the system, applicants can update various details including their CV (in ‘manage my details’) and apply for any open competitions. Applications can be started via selecting ‘My Applications’ and ‘New Application’. The application form for the scheme of interest can then be selected from the list provided.

After answering all of the eligibility questions, applicants will be able to start completing the online form. Applicants must ensure they have read all of the available guidance text including this document as well as any online instructions thoroughly whilst completing the form.

**Completing the Application Form**

Applicants are required to complete all of the mandatory sections of the form and to enter under the ‘Participants and Signatories’ section the names and contact details of those individuals fulfilling Participant and Signatory roles (see below).

Once the applicant has completed their sections of the form and the Participants and Signatories have made their contribution, the applicant is required to ‘Submit’ the application to the Signatories for final sign off before the closing date.

Applicants can only ‘Submit’ an application for final sign off by the signatories when:

- All mandatory sections of the application form are complete
- All Participants and Signatories have agreed to be a part of the application and have completed their relevant sections
- Applicants have completed the declaration information.

It is highly recommended that applicants complete their application well in advance of the deadline to allow the Participants and Signatories enough time to complete the relevant sections and declarations. Participants and Signatories who are required to complete part of the application form can do so at any time once they have agreed to be part of the application.

**Participants and Signatories**

Applicants are required to supply the names and email addresses (if not already registered on the award management system) of the individuals who will be undertaking Participant and Signatory roles as part of the application. Participants and Signatories must agree to be part of the application before it is submitted.

Participants and Signatories are required to review the declaration for their role before confirming participation. By confirming participation, Participants and Signatories are acknowledging their involvement and input into an application and agree to be involved in it. Applicants must ensure that all Participants and Signatories are happy for their application to be submitted before submitting it on the online system.

Please note it is often the case that one or more of the Participants are also named as Signatories.

**Participants**

- **Primary Academic Supervisor:** The individual acting as Primary Academic Supervisor must confirm that they have read the application and the guidance notes and are willing to act as the applicant’s primary supervisor and agree to abide by the conditions under which an award may be granted.
• **Additional Academic Supervisor:** If applicants wish to nominate an additional academic supervisor, this individual must confirm that they have read the application and the guidance notes and are willing to act as a supervisor and agree to abide by the conditions under which an award may be granted.

• **Senior Member of Practice:** This must be an individual at the General Practice/General Dental Practice who can confirm that, if an award is made, the applicant will have a clinical position within their organisation constituting 50% of the Fellowship and that arrangements will be put in place, which will enable the applicant to undertake the academic training described in the application and ensure that there is no shortfall in service provision. They must confirm they support this application and that they understand the conditions under which a NIHR In Practice Fellowship may be awarded. If unavailable at point of application this must be provided prior to contracting the award.

• **Referees:** Applicants are required to provide details of two referees who will be able to comment on their suitability for an NIHR IPF and who can evidence the applicants academic potential. Proposed Academic Supervisors cannot be listed as referees. Referees should be individuals who have had experience of the applicant in a research capacity and will be used by the NIHR IPF review panel to support their assessment of the suitability and commitment of the applicant to a career as a clinical academic. Each referee is required to complete a reference as part of the application form. The reference must be completed before the application can be submitted. Applicants will not be able to view the references, however, they will be able to check whether a reference has been completed via the validation summary.

### Required Signatories

• **Head of Department:** In agreeing to participate in this application, the Head of Department of the employing host organisation in which this award will be based must confirm that they support the application and that, if funded, the academic training programme will be supported and administered in the named organisation and that the applicant for whom they are responsible will undertake this work.

• **Administrative Authority or Finance Officer:** The Administrative Authority or Finance Officer of the employing host organisation is required to complete the finance section of the form in conjunction with the lead applicant and confirm, via the declaration, that they will ensure the accuracy of the financial details of the application and that the employing host organisation is prepared to host this award at the stated costs and to administer the award, if made.

### Application Submission

Once the application is ready (see list of required steps above), applicants are able to submit the application for final signatory approval. Upon submission by the applicant, the individuals added in the signatory roles will be prompted to sign back into the system and approve the finalised application.

The application will not be complete until all the required signatories have approved the final version of the form submitted by the applicant. **Only when the last signatory presses the ‘Approve’ button will the completed application be submitted to the NIHR.**

**Annex A** illustrates the submission process for the application form in the form of a flow diagram.

Please note, all of the steps described here, including signatory approval of the submitted application, must take place before the deadline of **1:00pm on 28th March 2018.** No extensions will be given and no exceptions will be made to allow for completion of the form.

Should you require assistance in completing the online form, please contact the NIHR:
Assessment of Applications

Following the submission deadline, the NIHR will check applications for completeness and eligibility, and distribute eligible applications to the members of the NIHR IPF Review Panel. The panel will assess all eligible applications using the Assessment Criteria below.

Key assessment criteria

- The quality of the academic training;
- the provision of a strong academic environment;
- the suitability and commitment of the applicant to a career as a clinical academic;
- the arrangements for ensuring protected time for the applicant coupled with ensuring continuation of clinical service;
- that the applicant has a clinical post where they undertake 5 clinical sessions or equivalent for 50% of their working week, which can include supporting clinical activities such as continuing professional development and administration;
- demonstrable track record of the host Academic Higher Education Institute (HEI) Department in training clinicians who have gone on to develop academic careers;
- value for money as a research training award.

Application Outcome

Applicants will be informed of the outcome of their application by email when all required processes are complete. No indication will be given of outcome before that. Feedback will be sent to all applicants after the funding decisions have been made.

Competition Timetable

Application window: 14th February – 1pm on 28th March 2018
Outcome: July 2018

Available start dates for successful applicants are:
- 1st September 2018
- 1st October 2018
- 1st November 2018
- 1st December 2018

Further guidance for submitting the application on the online application system is available from page 9 onwards.
Completing the Application Form

1. Application Summary Information

Host Organisation

Please give details of the organisation who will be the contractor if the Fellowship is funded. This must be the applicant’s proposed Employing Host Organisation (substantive employer).

Please note:

• The contractor is expected to respond to annual financial reconciliation exercises, provide the final financial reconciliation statement for the Fellowship and to respond to ad hoc requests for financial information during the lifetime of the project.
• In the same way, the contractor is expected to respond to any queries relating to Intellectual Property, commercialisation and benefit realisation.

If the name of your host organisation does not appear in the pre-populated list please email TCCawards@nihr.ac.uk

Proposed Start Date

Note this should be from the 1st of the month regardless of whether this is a working day or not. Please be realistic about your possible start date taking account of the necessary contracting, and staff recruitment prior to starting your Fellowship.

WTE of Award

Awards can only be undertaken with the WTE* options given.

Please select whether you wish to hold the fellowship on a full-time basis over 24 months (100% WTE) or part-time over 30 months (80% WTE) or 40 months (60% WTE).

It is not possible to undertake a Fellowship on any other basis other than 100%, 80% or 60% WTE.

* Whole Time Equivalent (WTE) = percentage of full-time hours per week.

2. Applicant CV

Please note, some of the responses to these questions are automatically pulled through from information entered in the ‘Manage My Details’ page.

Degrees and Professional Qualifications

Please provide the full details of any completed higher degree(s) and, where relevant, the full details of any higher degree(s) you are currently undertaking.

Present and previous positions

When entering details of your current and previous positions please indicate at what percentage (WTE) in each post you were undertaking research. For example, if you were a Clinical Lecturer and undertook research for 2.5 days a week and clinical work for 2.5 days per week; please enter 50% for that position. If you have worked part time at 60%, and undertook research for half of that time, please enter 30% for that position.
This information is used to assess applications to schemes for which there are specific eligibility criteria around the amount of research and/or clinical experience an applicant has.

**Research grants held**

Details of all grants obtained in the last five years should be provided, including personal research training awards or fellowships, plus any additional previous grants relevant to this application. Please indicate clearly any co-applicants and provide brief details of the nature and full extent of your involvement (e.g. project design, project management, day to day running, data collection, data analysis, writing papers for publication, etc.).

It is not necessarily expected that applicants at the pre-doctoral level will have been awarded research grant funding as a Principal Investigator (PI) or as a co-applicant, however if this type of funding has been obtained please list the details here. This may include travel grants or other small funding awards.

**Publication Record**

Please only include the details of articles which are in press and have been accepted as final by the publisher. Only publications relevant to your application should be included. Do not include abstracts, conference proceedings or articles in preparation. If relevant, details of these may be included in the ‘Applicant Research Background’ section.

Depending on professional background and expertise, applicants are not necessarily expected to have an extensive list of publications at the pre-doctoral application level.

**Relevant Prizes, Awards and other Academic Distinctions**

Please provide details of any awards or distinctions that would be relevant to your application including details of what the award was for.

**ORCiD**

The NIHR is an ORCiD member and encourages all researchers to obtain this persistent digital identifier that distinguishes them from every other researcher. Lead applicants must include an ORCiD iD in their application. Without it, your application will not be validated and you will not be able to submit. For more information and to register please see [http://orcid.org/](http://orcid.org/).

**Gender**

This question is included with the application form (in addition to being asked as part of equal opportunities monitoring) to ensure we are meeting NIHR’s commitment to gender equality in relation to academic career progression. The response to this question will not be displayed to the review panel.

**3. Applicant Research Background**

**Professional background**

Select the one option that best describes your professional background. This will determine any options that appear below for your profession, if applicable.
Please describe your research career to date

Please use this question to describe your research experience and career to date and how this makes you suitable for this award. You should include research you have led or made a significant contribution to (making clear what your role was), the research methods you have experience of, and the impact and outputs of the research you have been involved in. You should also detail any other relevant experience such as supervisory, management, teaching, public engagement and involvement, or leadership experience; or any other skills and experience which highlights your suitability for the Fellowship you are applying for and which demonstrates your potential as a future health research leader. Details of any abstracts, conference proceedings or articles in preparation that you feel are relevant to your application may also be included here.

Please note, it is not necessarily expected that applicants at the pre-doctoral level will have extensive research experience to date, however, this is an opportunity to demonstrate your commitment to a career as a clinical academic through any research activities that you have been involved with.

If you have previously held an ACF or had masters level training then please use this section to describe why you would benefit from further pre-doctoral training and development though the NIHR IPF.

Has this application been previously submitted to this or any other funding body?

Select ‘Yes’ or ‘No’ to indicate whether this or a similar application has previously been submitted to this or any other funding body. This must include any previous submissions for an NIHR research training award. Please detail the title of any previous submission(s), the funding body and scheme, the outcome and the date this is due if a decision is pending. If the application was unsuccessful please indicate why and detail how this application differs from previous submission(s) and how any feedback received has been used to inform this application.

Current and previous NIHR awards

In order to help track the progression of NIHR trainees please indicate whether you have previously held or currently hold another NIHR research training awards.

4. Training and Development and Research Support

Proposed training and development programme

This section should provide the NIHR IPF Review panel with information about the academic content, purpose and management of your NIHR IPF. You should discuss this section with your supervisor and your practice colleagues before you complete the form. Please describe the academic content of the proposed fellowship. You should include details of the research methods you will gain experience of, the area of academic research or educational research on which you will be focusing, and any qualification(s) you will achieve as a result.

It is important that the training and development programme is tailored to your specific needs and fully justified. Training may include, but is not limited to; formal courses, training in specialist skills and research methodologies, workshops, placements with other research groups or centres, leadership skills and conference attendance.

The completion of a formal academic qualification, such as a Master’s degree, can be supported as part of the training plan if appropriate to the developmental needs of the applicant. The academic element of the award should include the preparation of an application for a competitive, peer-reviewed doctoral level research training fellowship such as the NIHR Doctoral Research Fellowship, where relevant. Preliminary research in support of the subsequent doctoral level proposal (e.g. a systematic review or small feasibility study) may also be included. Research costs cannot be funded through this award, however, and
the primary supervisor for any subsequent award is responsible for ensuring a NIHR IPF awardee secures all necessary regulatory approvals before undertaking any research included in the NIHR IPF training and development programme.

**Primary Academic Supervisor**

The individual named here must also be added in the ‘Participants and Signatories’ section of the application form and is required to agree participation, thus confirming that they have read the application and the Applicant Guidance Notes and are willing to act as your primary academic supervisor and agree to abide by the conditions under which an award may be granted.

Careful thought should be given to:
- the PhD supervision experience of your chosen supervisor
- the availability of the chosen supervisor
- the experience of your chosen supervisor in the field of research and the methodologies relevant to your doctoral level proposal

The primary supervisor must be based at the proposed academic host organisation.

**Additional Academic Supervisors**

Applicants can also include a maximum of two additional academic supervisors to support their academic training and development if justified and appropriate.

The individual named here must also be added in the ‘Participants and Signatories’ section of the application form and is required to agree participation, thus confirming that they have read the application and the Applicant Guidance Notes and are willing to act as your supervisor and agree to abide by the conditions under which an award may be granted.

**Collaborations**

Detail any collaborations you intend to establish to support your training and development programme. This may involve short visiting placements or secondments in new (to the applicant) research environments, e.g. clinical trials units or NIHR Biomedical Research Units/Centres.

**Host Organisations support statement**

The Head of Department of the academic host organisation is required to complete this section. The statement should detail how the organisation is going to support the applicant to successfully complete their training and development programme. This statement should be tailored specifically to the applicant, their training needs, and include how the organisations intend to support the applicant to develop their clinical academic career in the long-term.

This section can only be accessed by the Head of Department once they have agreed participation and cannot be accessed, but can be viewed, by the applicant.

**Detailed Budget**

Guidance for the completion of the finance section is available in the next part of the Applicant Guidance Notes.
5. Participants and Signatories

A number of participants and signatories are required to be added to your application and, where applicable, to complete sections of it. Details of the required individuals are provided in the Applicants Guidance notes and in the online application form along with details of how they should be added. The flow diagram in Annex A goes through the actions required of participants, signatories and the applicant.

6. Acknowledge, review and submit

Conflict checks

Please declare any conflicts or potential conflicts of interest that you may have in undertaking this Fellowship, including any relevant, non-personal & commercial interest that could be perceived as a conflict of interest.

Agreement to terms and conditions

Please click the check box to confirm you agree to the Terms and Conditions of submission as detailed on the application form.

Finance Guidance

The finance section should provide a breakdown of the costs associated with undertaking the Fellowship and provide justification for the resources requested.

This section must be completed by the Applicant in conjunction with the Research Support Office or Finance Office at the employing host organisation (the organisation that authorised the application and which, in the event of an award being made, will employ the Applicant).

Applicants must make a copy of these Applicant Guidance Notes available to the Finance Officer in question.

The funding requested in the finance section will form the basis of the Fellowship should the application be successful.

All costs provided should be ‘value for money’ and will be assessed by the NIHR and members of the NIHR IPF Review Panel. The NIHR reserves the right to reject any costs that it considers unreasonable or not fully justified.

The NIHR IPF award funds:
- Up to 50% of the award holder’s salary (including the employer’s contribution to National Insurance and Superannuation) to support the academic component of the Fellowship.
- A training and development programme appropriate for an NIHR IPF.

There are limits on the amount that can be spent on the Training and Development programme. These are:
- Up to £4,500 towards a training and development programmes that can include, masters level training
- Up to £1,000 bursary (over 2 years) for conference/meeting expenses, travel, subsistence etc.

The fellowship does not include, or pay for, any research activities or full economic costing.

NIHR Personal awards are not project or programme grants; therefore, extensions to the duration of awards to allow for completion of research and/or training and development are not permitted. This does not affect suspensions of awards to allow for periods of maternity, paternity, adoption or sickness leave.
GENERAL INFORMATION to support the Completion of the finance section

- Costs must be provided at current prices. An adjustment for inflation will be made annually thereafter at rates set by the Department of Health and Social Care. Whilst allowances for incremental increases should be included on the form, nationally or locally agreed pay increases should be excluded.
- When justifying staff costs you should also provide the % amount of time input of each member of staff and link this to the specific area/work package of the proposed study where this input will be taking place.
- Years should be calculated starting from the anticipated start date of the proposed Fellowship. For example, if your Fellowship is expected to start on 01 June 2020 then its second year starts 01 June 2021.
- Further itemisation of costs and methods of calculation may be requested to support the application at a later date.
- Payments will be made to the contracted organisation only and the contracted organisation will be responsible for passing on any money due to their partner organisation(s).
- Appropriate sub-contracts must be put in place for any element of the Fellowship which is to be paid to another organisation.
- All applications are expected to have appropriate NHS, HEI, commercial and other partner organisation input into the finance section of the application form.

Higher Education Institution (HEI) Indirect Costs may not be claimed on this award, however all approved costs will be paid at 100% irrespective of the type of employing host organisation.

If the Employing host organisation is a Higher education Institute, please select the “other” option when entering the “Type of Cost” to prevent costs being submitted at 80%.

### Detailed Budget

#### Details of Posts and Salaries

This section presents an overview of salary costs for the applicant. Please state the proposed salary point and scale at the **start of the Fellowship** ("starting point on scale"). These should be detailed at 1.0 WTE.

**Please note** immediate promotion to a higher grade as a result of securing a fellowship will not be funded. Please **do not** include any Clinical Excellence or Discretion/Merit awards or discretionary points. NIHR agrees to fund consultant salaries at a full-time rate equivalent to 10 Programmed Activities per week

#### Direct Costs

These are costs that are specific to the Fellowship, which will be charged as the amount actually spent and can be supported by an audit record. They should comprise:

1) **Salary costs**

This section specifies the annual costs of the applicant. You should now allocate the individual staff member costs to each year of the Fellowship, allowing for increments. Use current rates of pay, and build in any known annual increments (again at current rates). You will not be able to claim for pay awards retrospectively, once a Fellowship is underway.

Please note the salary figures need to be calculated using the current annual costs, %WTE and number of months. If the research lasts for several years and an individual’s involvement varies over the course, it may
be necessary to explain fully in the justification of costs section the %WTE and months per year for an individual staff member.

It is important to double check that the %WTE, total months and yearly costs information are consistent with the information presented in ‘Details of Posts and Salaries’ (‘Details of Posts and Salaries’ should show the full current staff costs independent of % WTE etc, whereas the yearly costs in ‘Salary Costs’ depend on % WTE etc).

If the Employing Host Organisation is a Higher Education Institute, please select the “other” option when entering the “Type of Cost” to prevent costs being submitted at 80%.

**II) Travel, Subsistence and Conference Fees**

This section includes journey and subsistence costs, including conference fees.

If the Employing Host Organisation is a Higher Education Institute, please select the “other” option when entering the “Type of Cost” to prevent costs being submitted at 80%.

**Journey Costs**

Enter the total cost of transport for all journeys. If travel is by car, apply your institution’s mileage rates (however this should not exceed HMRC approved mileage allowance payments, which is 45p per mile for the first 10,000 miles and 25p thereafter).

Travel by the most economic means possible is encouraged. NIHR programmes do not usually fund first class travel.

**Subsistence**

Subsistence covers accommodation (if necessary) and meals associated with the travel, excluding any alcoholic beverages.

*Please note, there is a £4,500 limit on the amount that can be spent on a NIHR IPF Training and Development Programme, which includes non-conference related travel and subsistence costs.*

**Conference Fees**

If a cost relates to travel, subsistence or fees for a conference please select ‘conference fees’ as the cost description. Conference costs do not need to be individually itemised for each conference. The justification box should detail the conferences the costs will cover.

There is a £1000 limit on the amount that can be spent on conference related costs (including all related travel and subsistence as well as conference fees).

**III) Training and Development**

These are costs relating to the applicant’s training and development programme.

Please itemise and describe fully the costs associated with the training and development programme. Please provide estimates if exact costs are not available at the time of application. Any travel and subsistence associated with training and development should not be included here and should be included in the ‘travel, subsistence and conference fees’ section of the finance form.

Any conference costs should be included in the ‘Travel, Subsistence and Conference Fees’ section of the finance section.

If the Employing Host Organisation is a Higher Education Institute, please select the “other” option when entering the “Type of Cost” to prevent costs being submitted at 80%.
Additional Supporting Information

Plagiarism

The NIHR expects all content within applications for funding to be original material of the applicant's own work, with the exception of sections that other participants are required to complete. Whilst we anticipate and expect that applicants will get help and advice from various sources when putting together an application, including on occasion input from those previously awarded funding, care must be taken to ensure this does not lead to plagiarism of either published work or other previous applications. If an allegation of plagiarism is raised against an application, this will be investigated in accordance with the NIHR's policy on plagiarism, a copy of which is available on request from tcc@nihr.ac.uk.

Data Protection

The Department of Health and Social Care, National Institute for Health Research (DHSC NIHR) is the Data Controller under the Data Protection Act 1998 ('the Act'). Under the Data Protection Act, we have a legal duty to protect any information we collect from you. You should be aware that information given to us might be shared with other DHSC NIHR bodies for the purposes of statistical analysis and other DHSC NIHR research management purposes. NIHR also reserves the right to share, in confidence, details of your application with other approved research funding organisations outside NIHR, and peer reviewers for the purposes of selection and assessment, in order to coordinate research activity in the UK.

Information collected from you will not be passed to any third party outside the NIHR except specifically as detailed above without your consent except where we are under a statutory obligation or entitled to do so by law. Applicants may be assured that DHSC NIHR is committed to protecting privacy and to processing all personal information in a manner that meets the requirements of the Act.

Data Security

Personal information will be held on a secure network with strictly controlled user access. Your details will be retained by the NIHR on behalf of the Department of Health and Social Care to facilitate the running of our programme. If your application is successful, your name and the details of the host organisation, will appear on the NIHR website (www.nihr.ac.uk). In addition, once funding has been agreed and the contract signed, your details will appear in other literature as an award holder and will be passed to the Department of Health and Social Care (DHSC) for inclusion in their publicly available databases of research projects. Your name will be added to our mailing list. This means that you will be sent updates on all the programmes. We may also send you separate literature about the NIHR research training programmes and related events in health research. If you have any questions, or if you would prefer not to receive routine and/or general communications, please contact us at: tcc@nihr.ac.uk.

NIHR Privacy Policy

The privacy policy sets out how the NIHR uses and securely protects any information that you give us when you use the award management system and other websites, systems and services of organisations that are contracted to the Department of Health and Social Care to improve the health and wealth of the nation through research. The NIHR may change this policy from time to time. You may check the latest document content at any time by visiting the privacy policy page of the NIHR website at http://www.nihr.ac.uk/privacy-policy.htm.

International Standard Randomised Controlled Trial Number (ISRCTN)

All primary research studies need to be assigned an ISRCTN. You can view the ISRCTN website at: www.isrctn.org/. Please note that the remit of this database has been widened to
include all primary research projects, even those that are not randomised controlled trials. There is no registration fee for NIHR funded trials.

**For systematic reviews to be registered with PROSPERO**

Applicants undertaking systematic reviews should note the commitment of the NIHR to publication in the PROSPERO database. PROSPERO was developed by the NIHR’s Centre for Reviews and Dissemination (CRD), and is the first online facility to register systematic reviews for research about health and social care from all around the world. Access is completely free and open to the public. PROSPERO registration is a condition of NIHR funding for eligible systematic reviews. Please refer to the PROSPERO website for more information: [http://www.crd.york.ac.uk/prospero/](http://www.crd.york.ac.uk/prospero/).

**UK Biobank**

UK Biobank is a major national health resource, and a registered charity in its own right, with the aim of improving the prevention, diagnosis and treatment of a wide range of serious and life-threatening illnesses – including cancer, heart diseases, stroke, diabetes, arthritis, osteoporosis, eye disorders, depression and forms of dementia. UK Biobank recruited 500,000 people aged between 40-69 years in 2006-2010 from across the country to take part in this project. They have undergone measures, provided blood, urine and saliva samples for future analysis as well as detailed information about themselves. The health of members of this large cohort will be followed over the coming years and the participants have consented to be approached about health research. [http://www.ukbiobank.ac.uk/](http://www.ukbiobank.ac.uk/)

Applicants are encouraged to consider whether Biobank may be able to provide suitable data for their study. We do not want to discourage establishment of new collections of participants and their data where this is necessary to address the research questions under consideration, our aim is to avoid applications for funding to set up Biobank-like cohorts where the use of Biobank would prevent wasteful duplication of Biobank-like activities.

**NIHR Carbon Reduction Guidelines**

Researchers applying for NIHR funding are asked to consider the carbon footprint of their research and take steps to reduce carbon emissions where appropriate. Advice on how to do this can be obtained from the NIHR Carbon Reduction Guidelines [https://www.nihr.ac.uk/research-and-impact/documents/NIHR-Carbon-Reduction-Guidelines.pdf](https://www.nihr.ac.uk/research-and-impact/documents/NIHR-Carbon-Reduction-Guidelines.pdf).

**Transparency Agenda**

In line with the government’s transparency agenda, any contract resulting from this tender may be published in its entirety to the general public. Further information on the transparency agenda is at: [https://www.gov.uk/government/publications/procurement-and-contracting-transparency-requirements-guidance](https://www.gov.uk/government/publications/procurement-and-contracting-transparency-requirements-guidance).

**Clinical Trials Unit (CTU) Support**

Applicants who are thinking of including a clinical trial, feasibility or pilot study as part of their application, or who are undertaking research and/or training related to clinical trials are encouraged to consider working with a CTU where appropriate. Further guidance for trainees and applicants is available in the NIHR Clinical Trials Guide for Trainees [https://www.nihr.ac.uk/funding-and-support/documents/Clinical-Trials-Guide.pdf](https://www.nihr.ac.uk/funding-and-support/documents/Clinical-Trials-Guide.pdf). This includes guidance on how to go about approaching a suitable CTU to support your application.
MRC Complex Intervention Guidance

Where appropriate applicants are encouraged to read the MRC complex interventions guidance available here: https://www.mrc.ac.uk/documents/pdf/complex-interventions-guidance/.

NIHR Research Design Service

The NIHR Research Design Service (RDS) supports prospective applicants to make high quality applications for research funding from the NIHR and from other national research funders. Assistance is primarily focused around refinement of research questions, research design and methodological support, complementing the advice applicants receive from supervisors and/or mentors. The RDS also assists prospective applicants to understand the scope of the NIHR’s various funding streams and to develop patient and public involvement (PPI) strategies. The RDS may be able to support applicants with small grants to work up PPI plans with, for example, patient groups.

The RDS has regional offices and links with local networks. Further information regarding support that the RDS can provide and contact information for each regional office is available via the NIHR website: https://www.nihr.ac.uk/about-us/how-we-are-managed/our-structure/research/research-design-service/.

NIHR INVOLVE

INVOLVE is funded by the National Institute for Health Research, to support active public involvement in NHS, public health and social care research.

As a national advisory group, its role is to bring together expertise, insight and experience in the field of public involvement in research, with the aim of advancing it as an essential part of the process by which research is identified, prioritised, designed, conducted and disseminated.

INVOLVE can support prospective applicants and existing awardees to incorporate effective patient and public involvement into their work. Support includes; help with calculating appropriate costs for involving patients and the public, help with developing potential strategies for involvement, case studies of involvement activities including the impact they have had, and help with writing plain English summaries. Full details of the support INVOLVE can provide and contact information is available via the INVOLVE website: www.invo.org.uk.

CRN Support

The NIHR Clinical Research Network (CRN) supports researchers and the life sciences industry in planning, setting up and delivering high quality research to the agreed timelines and study recruitment target, for the benefit of the NHS and its patients in England.

In partnership with your local R&D office, we encourage you to involve your local CRN team in discussions as early as possible when planning your study to fully benefit from the support the NIHR CRN offers as outlined in their Study Support Service. To find out more about how you can apply for this additional support to help deliver your study, please visit www.supportmystudy.nihr.ac.uk.

Ethics / Regulatory Approvals

Guidance on the application process for ethical and other approvals can be found on the HRA website. Please note that if your study is led from England and involves the NHS in England you should apply for HRA approval.
If you are using patient information from an existing database, you should check whether the patients have given their consent for their data to be included in that database for research purposes, or if not whether the database is exempt under Section 251 of the NHS Act 2006. Where exemptions are not already in place, approval to use confidential patient information without consent must be requested from the HRA who make decisions with advice from the Confidentiality Advisory Group (CAG).

NOTE: NIHR is interested in taking advantage of the growing utility of routine data (such as HES, GP records etc.), and would like investigators, where appropriate, to ask study participants to consent to long term follow up (e.g. beyond the outcomes to be collected in the funded trial) using routinely collected data, and appropriate linkage to allow this data to be best used.

Contractual Arrangements

Financial support under an NIHR Fellowship is subject to a contract between the NIHR and the employing host organisation.

Once funding for a Fellowship has been discussed and agreed, the NIHR will confirm the financial arrangements with the employing host organisation. The NIHR will provide the employing host organisation with a contract setting out the details of these arrangements. The employing host organisation will be expected to issue the Fellow with an employment contract commensurate with their experience and seniority.

Government procurement transparency regulations require publication of details of all contracts made with the Department of Health and Social Care on the Department of Health and Social Care Website. Confidential information including research proposals (Plain English Summaries will be published), detailed finance information, bank details, and departmental staff names (other than the award holder’s name) will be removed from the published versions.

Freedom of Information Act

The NIHR manages the NIHR IPF Programme on behalf of the National Institute for Health Research (NIHR) and Health Education England. As such, the findings of researchers funded by the programme are incorporated into the Department of Health and Social Care Freedom of Information Publication Scheme: https://www.gov.uk/government/organisations/department-of-health/about/publication-scheme

Equal Opportunities and Diversity

The NIHR and DHSC have a duty as a public body to promote equality of opportunity. All applicants will be contacted shortly after the closure date by NIHR Equality Monitoring. Monitoring ensures that all applications to NIHR Programmes are treated equally in terms of gender, ethnicity and/or disability.

The information you share with the monitoring system:
- will be stored separately from your application
- only be used for the purpose of monitoring equal opportunities
- be kept securely and in confidence

Guidance and Advice

Please read these Applicant Guidance Notes carefully. If you require any further information, advice or guidance please contact:

NIHR Trainees Coordinating Centre, Tel: 0113 346 6260, Email: TCCawards@nihr.ac.uk

Annex A Application Submission Flow Diagram

1. Application created by Lead Applicant

2. Lead Applicant adds Participants and Signatories details

3. Signatories log in and confirm their participation. This will be:
   - Head of Department
   - Finance Officer

3. Signatories complete relevant sections of form

3. Lead Applicant continues entering data and completes all relevant sections of form

4. Lead Applicant ‘Validates’ and presses the ‘Submit’ button

5. Automated emails sent to advise Signatories†

6. Head of Department must log in and approve application*  
   
6. Finance Officer must log in and approve application*

7. Application is fully submitted to NIHR TCC for consideration

*Rejection of the application by any individual at Stage 6 will return the application to Stage 3.

†Automated “Out of Office” replies to these emails will not be relayed to the applicant.
