

ICA

HEE/NIHR Integrated Clinical Academic Programme
for non-medical healthcare professionals

Amendments to the eligibility criteria for ICA Programme awards 2018

In time for the 2018 ICA PCAF, CDRF, CL and SCL competition launches, we are pleased to announce that the ranges of eligible hosts and eligible clinical activities have been expanded to include health and/or care providers and services that provide free healthcare at the point of delivery.

Specifically, hosting health and/or care providers are now required to provide at least 50% of their services free at the point of delivery, whilst an awardee is required to spend at least 50% of their supported clinical time delivering health and/or care services that are free at the point of delivery.

All previously eligible hosts and eligible clinical activities remain eligible.

These changes will be of particular interest to charities and their staff.
