

# People in Research

National Institute for Health Research

# 215

opportunities were posted on the People in Research website between **August 2017 - July 2018**. People in Research is for members of the public who would like to **get involved** in research and researchers who want to find members of the public to **get involved** in their research.

How opportunities have **grown** over the past three years

**126**

Aug 2015 - July 2016

**149**

Aug 2016 - July 2017

**215**

Aug 2017 - July 2018

People in Research is straightforward to use

Very easy

 Dementias Primary care Respiratory disorders Diabetes  
 Neurological disorders Health services and health delivery  
 Skin disorder/dermatology Ear nose and throat Dermatology

All the topic areas that are advertised on People in Research

**60%** of people were looking for **4** or more candidates to take part

We have **successfully** included people on our PPI panel and have **involved** them in various PPI exercises since advertising the opportunity through People in Research.

The organisations who were looking for members of the public to get involved in research were from:

Education  
 NHS  
 NIHR  
 Industry

**YES!**  
 People would recommend PiR to others

Map showing the geographic regions people were **recruiting** from during August 2017 - July 2018

I use People in Research to look for **opportunities**, as I am very interested in giving back to the research. I have **personally benefited** from others involvement, so that's why I get involved.
